KATIE YOUNG

Las Vegas, NV · 937-239-2748 · katie.f.young@me.com · www.linkedin.com/in/dev-katie-young/

PROFESSIONAL SUMMARY

Versatile Software Engineer with 4 years of experience building high-impact web applications and desktop solutions across diverse technology stacks. Currently specializing in frontend development with expertise in React, TypeScript, and modern frameworks, while continuously expanding into emerging technologies like Rust and Tauri.

At Dusk Labs, I serve as the sole frontend developer for a security-focused desktop application, where I quickly mastered Rust and Tauri frameworks to deliver full-stack solutions. My self-directed learning approach and AI-assisted development strategies enabled me and my team to complete projects 3 months ahead of schedule while maintaining exceptional code quality.

Previously, as Lead Shopify Developer at Art Brand Studios, I drove significant business impact by implementing UX/UI improvements that boosted user interaction by 25%. I excel at translating complex technical requirements into intuitive user experiences, leveraging JavaScript, CSS, and various APIs to create seamless e-commerce solutions.

My experience spans both agency and product environments, from building responsive applications for high-profile clients at Sandstone to contributing to data-driven platforms at DoltHub. I'm passionate about mentorship and knowledge sharing, having guided fellow developers through technical challenges and code reviews.

Core competencies include React, TypeScript, JavaScript, Rust, GraphQL, and RESTful APIs. I excel at managing competing priorities and tight deadlines, consistently delivering features in Agile sprints while maintaining focus on user experience and technical excellence. Always eager to tackle new challenges and contribute to innovative projects that push technological boundaries.
